

Assetz Property Group Launches Tower B At 63° East In Bangalore

About 68% open space with dedicated organic farming space and a 40,000 sq-ft clubhouse. Assetz Property Group has launched the third tower with spacious studio, 2 & 3 BHK homes, part of a luxury township – 63° East in Bangalore. Assetz has already launched two towers with a product mix of 1, 2 & 3 BHK homes that are nearing completion with 80% sold out.

The 26-acre sustainable township is located off Sarjapur Road, a neighbourhood that has seen the housing demand increase year by year owing to the development of several IT parks and big players of the industry making their way into the city. This, of course, has helped in the improvement of the social infrastructure of the locality such as excellent schools, world-class health care facilities, various options for retail, etc. The project also happens to be in close proximity to the third phase of the proposed Bengaluru Metro.

With sustainability and green living being the need of the hour, the homes at 63° East are designed keeping in mind the residents and the environment around. They have incorporated several conservation methods within the project such as rainwater harvesting, solid waste management, energy and water saving fixtures, etc. However, there is no compromise made on the lifestyle or the kind of luxury one gets living here. The homes are fitted with the best-in-class specifications including a trusted brand such as Jaquar or equivalent.

The homes are designed for the aspirational, the go-getters and the ambitious. In a city where our lifestyle has taken over our private spaces, these homes give you that and more. The previous towers having done so well, left room for more innovation and thought process. This led to the inception of the new tower with units that have bigger floor plans and a higher efficiency rate. The homes are designed for the aspirational, the go-getters and the ambitious. In a city where our lifestyle has taken over our private spaces, these homes give you that and more. The other highlight of the newly launched homes is the presence of big windows that allows for plenty of natural lighting and good ventilation.

The project has many other stand-out features such as the 40,000 sq-ft clubhouses and a wide range of global standard amenities. There are over 25 amenities that will be handed over phase wise which includes five swimming pools, three badminton courts, dedicated walking paths, skating rink, organic farming space, yoga deck, amphitheatre, terraces with seating and provisions for barbecue, library,

aerobic studio, etc. “The project is so versatile, our customer portfolio includes young families to independent working individuals or even retired couples. The amenities provided cater to all needs and interests, providing something for everyone. Furthermore, Sarjapur happens to be one of the most wanted locations for a home and this will only increase in the coming years. 63° East is a stand out project with exclusive features and attention to small details.” says Rohit Cariappa, director, sales, Assetz Property Group.
